

SYSTEM FOR EDITING QUERY CONDITIONS, CALCULATIONS, FORMULAS AND EQUATIONS

ABSTRACT OF THE DISCLOSURE

Editing query conditions, calculations, formulas and equations, or any other
5 parts of a form includes providing a hyperlink for an element in the form to indicate to a
user that a control is available for the element. Upon a selection of the hyperlink by the
user, the control is presented for user interaction. Upon completion of user interaction
with the control, the element is replaced with a new element responsive to user action.
The control can be a list of choices, such as a pull-down menu, a dialog box, or a text
10 entry field. The hyperlink can be color coded and underlined.
